A Splendid American Conifer

Abies fraseri, True Fraser's Fir

Specimen Fraser's Fir on Grounds of Highlands Nursery
Absolutely hardy. Makes a fine windbreak

For Landscape Architects, Parks,
Cemeteries, Botanical Gardens and
other Public Institutions a special
discount of 10%

Abies fraseri

THE TRUE FRASER'S FIR

THE northern species, *Abies balsamea*, is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived.

Fraser's Fir, however, is a distinct species from the highest peaks of the Carolina mountains, and makes a perfect specimen lawn and screen tree, with dark green, thick-set foliage (*blue underneath*) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

ABIES FRASERI (Fraser's Fir)

	Each	Per 10	Per 100
1-1 1/2 feet . . .	\$0.30	\$2.00	\$12.50
1 1/2-2 feet60	5.00	40.00
2-3 feet . . .	1.25	10.00	80.00

Extra specimens, with ball, and of perfect shape, 6 to 8 feet, at \$6 to \$8 each; larger sizes, \$10 to \$15 each.

A New American Rhododendron

R. carolinianum

Specimen plant supplied by Highlands Nursery. Flowers
clear pink without the slightest tinge of magenta

Rhododendron carolinianum

A New American Species

Clear Pink

Absolutely Hardy

THE smallest Alleghanian species; attains 6 to 8 ft. in cultivation. Leaves dark green, usually blunt and narrow, covered with rusty dots below; much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species. Until this year we have been sending this beautiful and rare species out under the name of **punctatum**. Professor Sargent has recently called attention to the fact that it is a distinct species from the **punctatum**, differing in time of bloom, with more showy and profuse flowers, and making a much larger and finer plant than the true **punctatum**.

It is now known as **Rhododendron carolinianum**, being described and named by Alfred Rehder, Arnold Arboretum, Jamaica Plain, Mass.

Sizes and Prices, f.o.b. Boxford Nursery

	Each	Per 10	Per 100
9-12-inch strong plants	\$0.75	\$6.00	\$50.00
